AEON MALL (CAMBODIA) CO., LTD.

~ Committed to environmental protection and social contribution ~

AEON MALL Sen Sok City installed an additional 2MW of Solar Panels

AEON MALL (CAMBODIA) CO., LTD. (“the Company”) has installed the additional solar panels at AEON MALL Sen Sok City (“the Mall”) successfully and the operation will start from January 28th, 2022.

Since the opening in 2018, the Mall has reduced the power consumption significantly by introducing a 1.03 MWp solar power generation equipment and a high-power cooling unit that have been adopted by the 2016 Joint Crediting Mechanism (JCM) equipment assistant which is partially supported by the Ministry of Environment of Japan (MOEJ). The Company has successfully installed an additional 2.19 MWp of solar panels. In total, the solar power system becomes 3.23 MWp which leads the Mall to become the largest rooftop solar power system among the shopping malls in Cambodia. The installation of additional solar panels aims to help reduce electricity consumption in order to solve the energy shortage due to the increasing demand for electricity day by day in the country.

By using the renewable energy with environmental considerations to reduce CO₂ emission, the Company also planned to add extra solar panels to AEON MALL Phnom Penh which is currently under major renovation and expansion project. We hope that this action will make a significant contribution to support the Sustainable Development Goals (SDGs) in Cambodia.
